### DETERMINATION OF NONSIGNIFICANCE (DNS)

**Name of Proposal:** DNS 15-024: STOLP VEGETATION REMOVAL

**Description of Proposal:**

The proposed project includes the removal of reed canary grass and sediment along 1,350 LF of Rock Creek. This vegetation has impeded channel flows resulting in siltation and long periods of inundation. The property owner has historically used this land for agricultural crops and livestock grazing purposes.

Vegetation removal will be done to maintain the pre-existing channel conditions. The channel will be modified to ensure existing wetlands are not drained or filled with new material. Any trees, bushes and woody debris will be cut at or above the channel bottom with hand equipment. The excavated material will be spread / broadcast south of the creek bank. Work will occur during dry seasonal conditions to minimize erosion impacts from equipment and machinery.

The proposed improvements will allow the livestock to access the entire property by enhancing the two existing cattle crossings.
